DETAILED ACTION

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1, 4-7 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

a). Claim 1 recites the limitation "the resultant mixture" in lines 7-8. There is insufficient antecedent basis for this limitation in the claim.

b). The "wherein" clause in claim 5, i.e., "wherein after removal of only a part of fatty acids or their monohydric alcohol esters (FA) from the mixture (MX)..." provides for ambiguity and confusion. It is at odds with claim 1 which recites "distillation refining the resultant mixture to remove a part or all of fatty acids or their monohydric alcohol esters (FA) from the mixture" presupposing removal of acids and esters from the resultant mixture (obtained after the mixture (MX) is subjected to addition of organic acid), not from the mixture (MX) as indicated above.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1, 4-5 and 7 are rejected under 35 U.S.C. 103(a) as being unpatentable over JP 4-261497 or Zwaneburg et al (5,250,155) in view of Coleman et al (4,275,081).

The above references are applied for the same combined reasons as set forth at pages 3 and 4 of the previous Office action.

Claim 6 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims; and including the argued "suppressing isomerization of the desired 1,3- saturated-2-unsaturated triglycerides (SUS)".

Applicants' arguments filed December 5 2007 have been fully considered but they are not persuasive.

Applicants' argument that in JP 4-261497, Zwaneburg et al. and the Coleman et al. reference "There is no teaching or suggestion of suppression of isomerization of SUS component during refining of an interesterification" is not considered well-taken.

The claims are not limited to the argued "suppression of isomerization of the SUS component" commensurate with the argument. Applicants fail to delineate process/method steps not shown nor render obvious by the prior art.

Applicants' amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within

TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
